RA-660

Case #08-1305

Violations contained in Tennessee Consent Order: In November of 2008 licensee appraised property located in TN with complaint filed by AMC. Licensee misstated previous listing history and did not analyze current agreement. The report does not adequately and reasonable describe, discuss or analyze the factors that affect marketability or market area trends. Licensee does not provide an adequate opinion of highest and best use, no analysis of the repairs in relation to the prior sale of subject property, no previous sales history for the comparables, does not provide the analysis of the extraction method for obtaining site value or documentation to support the cost approach information. Further there was no other analysis or documentation found in the report or work file to support the GRM used. The cost and
